ACCESSORIES

Step-Up Rings

Filter and Lens Size Versatility

- Use larger diameter filters on lenses with smaller diameter filter threads
- Often mandatory for shorter focal length lenses in order to prevent vignetting

Step-Down Rings

Filter and Lens Size Versatility

- Use smaller diameter filters on lenses with larger diameter filter threads
- The diameter of the filter or lighting to which step-down rings are coupled will be much smaller than the diameter of the lens (often resulting in vignetting)
