

Blue Mango Technology Video Management Software

Blue Mango Video Management Software is a powerful VMS for Video Surveillance. Manage up to 64 analog or digital cameras including IP, HD-SDI, and USB cameras. It offers simultaneous recording and viewing of live video from multiple cameras.

Blue Mango's VMS GUI is easy-to-use for quick set-up of your cameras, motion detection, event triggering, and etc.... Mix and match analog, IP, PTZ, or HD-SDI cameras. Unlike many VMS packages Blue Mango has a fixed license fee regardless of the number of cameras used.

For home security to a 64 camera commercial installation Blue Mango's VMS has a robust set of features for your surveillance needs.
